Welcome To Our City

Our goal at Silver Dollar City is to *Create Memories Worth Repeating®* for every member of the family. This brochure is designed to assist you in planning your visit to our park.

Park maps are available at the turnstile entrance and include a picture layout of the park, show schedule and park service information.

To maintain our park's friendly atmosphere, we ask that all guests be courteous to other visitors and our hosts. Please abide by all safety information posted throughout the park and instructions provided by our hosts.

Thank you and enjoy your visit!

ACCESSIBLE PARKING

Parking for guests with disabilities including van accessible spaces are available. All vehicles using a marked disabled parking space must have a government-issued license plate or displayed disabled parking tag.

Follow the signage and instruction of the parking lot hosts. Accessible parking is utilized on a first-come, first-served basis. When accessible parking is full, guests will be directed to park in other guest parking lots. Motorized conveyances will be provided to and from these lots as needed. If you are unable to board the conveyance, please alert a parking lot host for assistance. A guest drop-off area is available for vehicles directed to park in other guest parking lots.

TRANSPORTATION TO THE FRONT GATE

Conveyance stops are located in most parking lots or within walking distance at Silver Dollar City. Service animals are allowed on conveyances provided they meet the guidelines in this brochure.

TICKETS

Tickets may be purchased ahead of time by visiting silverdollarcity.com or by calling 800.831.4FUN (386). Tickets are also available at the park's Front Gate.

Guest Services and Park Amenities

GUEST SERVICES

Guests Relations is located at the entrance of the park. The hosts can provide a variety of services and additional information on amenities available at the park.

WHEELCHAIR AND ECV RENTAL

Wheelchairs and Electric Convenience Vehicles (ECVs) are available for rent on a first-come, first-serve basis. Manual wheelchairs are available, upon request, at the guest drop off area. Please ask a parking host for assistance. The rental booth is located inside the park just past the turnstiles. Guests between 16 and 18 years of age must have a parent/legal guardian at least 21 years of age sign the rental agreement. A limited number of reservations are taken by calling 800.475.9370. Reservations must be made at least 24 hours in advance of your visit. A nominal convenience fee will be added to all advanced reservations.

Silver Dollar City reserves the right to refuse entry of any ECV deemed unsafe for operation on park grounds due to size, mechanical condition or functionality. Guest owned ECVs must have at least three wheels, measure no wider than 30 inches, be battery powered and must be operated by a single operator in a seated position. Please contact Guest Relations for more information.

All guests using ECVs must adhere to park rules, manufacturer's guidelines and instructions given during the rental transaction. These rules include:

- Please remain seated at all times
- Only a single passenger on each ECV or wheelchair
- Drive slowly and cautiously in crowded areas
- Operate no faster than walking speed
- Do not drive over curbs or on steps
- Do not make sharp turns at high speeds or while on hills or ramps

Due to the terrain of the park, guests using these devices shall follow the designated pathways outlined in the park map and instructions given at the time of rental. Leaving the designated pathways may cause the ECV/Wheelchair to become unstable. Please observe the following:

- No ECV/Wheelchair usage on Hill Street between Fried Fancies and Wagon Works
- No ECV/Wheelchair usage in Midtown between Mary's Springhouse and Grandfather's Mansion
- No ECV/Wheelchair usage on woodchip paths near McHaffie's Homestead and throughout the park.

Note: Due to the slight grade and uneven terrain, guests should operate with caution along paths in Midtown, the Corkscrew pathway, behind Buckshots and the path from Mountain Leather to the American Plunge.

FIRST AID

The First Aid Office is located behind Brown's Candy at Silver Dollar City. The office is staffed with state licensed EMTs and Paramedics. If you have an emergency, please contact any park host and he/she will notify First Aid to respond to you.

Guests bringing medications that must remain cool and/or extra oxygen bottles may leave these items at First Aid. Please clearly label medications and other personal belongings with your name, address, and phone number. An ID may be required to retrieve the items.

SERVICE ANIMALS

Trained service animals, as currently defined under the Americans With Disability Act (ADA), are welcome at Silver Dollar City. All service animals must remain on a leash or in a harness and be under the owner's control at all times. Owners are responsible for disposing of animal waste. Service animals are not permitted on most rides and must exit the loading area after the owner has boarded on all attractions except: Frisco Silver Dollar Line, Grandfather's Mansion, Half Dollar Holler Carousel, Treetop Trail Houses, Sand Play and the Swinging Bridge. Hosts may not take responsibility for, or provide care to any service animal.

THEATERS

All indoor theatres have access entrances for guests with disabilities. Please refer to the show schedule available in the park map for show times. Seating is limited and is filled on a first-come, first-served basis. At indoor venues, only one companion will be permitted to accompany the guest with a disability. All other members of the party will be asked to wait in the theatre queue line and will be seated in available seating inside the theatre, provided there are available seats. Due to state fire codes, wheelchairs, ECVs, strollers and other such devices may not be parked in the aisles. Guests who bring ECVs and manual wheelchairs into the theatre will be asked to remain in their mobility device. ECVs with sun shades are prohibited in all indoor theaters. Theatrical lighting is used in our indoor venues which may include strobe and/or moving lights. Non-toxic and hypoallergenic theatrical fog and/or haze may also be used. Please also be advised that peanuts are served in the Saloon and at Echo Hollow® concessions. All outdoor theaters are accessible to guests with disabilities. All safety guidelines and fire codes for indoor theaters also apply to outdoor venues. If you have any questions or require assistance, please notify an usher or technician.

Assisted Listening Devices are available for guests with hearing disabilities. Please go to Guest Relations located at the park entrance 2 hours prior to the show you would like to attend.

REQUESTS FOR INTERPRETATION

With a minimum of 14 days advance notice, Sign Language interpretation can also be requested for special events and shows. To request performance schedule confirmation or to request sign language interpretation at a specific special event or show, please call Customer Service at 800.888.7277 or email customerservice@silverdollarcity.com. Guests will be contacted prior to their visit to verify arrangements, and they will receive an appropriate show schedule that lists the dates and times of the interpreted performances.

RESTAURANTS

Please ask any host if you need assistance at any time or have special dietary needs. All menu items served have a detailed ingredient list available on location. Allergen-free menu options also available upon request. Call 48-72 hours in advance of your visit to the park and we can personalize your allergen-free meals and deliver to the restaurant of your choice (800.251.5576). Please note: peanuts are served in concession stands and the Saloon.

GAMES

All games in the Grand Exposition are accessible to guests with disabilities. All games require an additional fee and are not included in your park admission.

SHOPS

Please ask a shop host if you need assistance at anytime in one of our merchandise locations.

SPECIAL REQUESTS

Silver Dollar City is committed to providing a convenient and comfortable experience to all of our guests. Every person with a disability is different, and you are the best judge of the service you require. If you have a special request, please contact us by email, customerservice@silverdollarcity.com as early as possible. We will try to accommodate to make your visit as enjoyable as possible.

Guidelines Applicable to All Attractions

Each of our ride experiences is uniquely different. Ride admission safety requirements are determined by the ride dynamics, the restraint system used and recommendations made by the ride manufacturer. Ride information and restrictions (such as height, health, size and age) are posted at each ride location to assist you in deciding whether or not to ride based on your knowledge of your own ability or physical condition.

We encourage you to watch the attraction when possible prior to choosing to ride. If in doubt, do not ride.

1. Riders must **read and observe ALL** ride postings and instructions to include Rider Responsibilities for the State of Missouri.
2. All guests are required to meet minimum height and ride requirements, regardless of ability. All ride requirements are strictly enforced. The park reserves the right to refuse ride boarding to anyone who is unable to meet the ride requirements.
3. All guests are required to be restrained on applicable attractions. All restraint systems on the ride must be utilized and positioned properly. ***Neither guests nor ride personnel shall force a restraint system to secure it.***
4. All guests must be able to exit the ride safely should a shutdown occur. Guests who need additional assistance should be accompanied by a companion.
5. Loose articles (including cell phones and cameras) must be removed prior to riding. Waist packs (or fanny packs) must be removed prior to riding Outlaw Run, PowderKeg, WildFire, FireFall, Thunderation and The GIANT Barn Swing. Scarves or foulards must be removed or properly secured prior to riding Outlaw Run, Fire-In-The-Hole, The GIANT Barn Swing, all rides in the Grand Exposition, all rides in Fireman's Landing, High-Low Silos, PowderKeg, Thunderation and WildFire. For safety reasons and in consideration for guests waiting in line, items lost inside a ride perimeter cannot be retrieved until park closing. We recommend you leave loose articles with a non-rider or secure them in a park locker. Articles taken on Lost River Of The Ozarks, Tom & Huck's RiverBlast and American Plunge will get very wet. Due to vibration on most rides, guests should take necessary precautions to protect hearing devices, eyeglasses and all loose articles on rides at all times, as they may be damaged on rides.
6. Glass, food and drinks are not permitted on any ride except the Frisco Silver Dollar Line. Shirt, shoes and pants/shorts are required on all rides.

LARGE OR TALL GUESTS

Larger or taller guests (including guests who weigh more than 200 lbs., have a chest dimension of 52 inches or greater, or a 40 inch waistline) may not be able to ride the following: Outlaw Run, Electro Spin, Elephant March, The GIANT Barn Swing, The Grand Exposition Coaster, High-Low Silos, FireFall, Up The Ladder, Magnificent Wave Carousel, Regatta, PowderKeg, Thunderation and WildFire. Guests 80 inches or taller are prohibited from riding the High-Low Silos.

CASTS OR RESTRICTIVE DEVICES

Guests wearing casts or other restrictive devices may not be able to ride if they prohibit proper securing of the restraint device(s) or as directed by the manufacturer of the ride. Hard and soft casts are not permitted on WildFire. Hard casts are not permitted on Outlaw Run.

ARTIFICIAL LIMBS / AMPUTEES

All guests must possess sufficient body length to be restrained by the restraint device(s), and sufficient body strength to brace themselves and maintain a seated position throughout the ride. Please ensure all artificial limbs are secure and will not become detached during the ride experience. Guests with leg prosthetics may not ride Outlaw Run. Guests with leg prosthetics above the knee may not ride the following: The GIANT Barn Swing, PowderKeg and Wildfire. Guests with leg prosthetics above both knees may not ride the following: Fire-In-The-Hole, Grand Expo Coaster, Happy Frogs, High-Low-Silos, Lucky's Dizzy Dogs, Mighty Galleon, Racing Regatta, Royal Tea Party and Thunderation. Please disclose any amputations or artificial limbs to the ride attendant.

COMPANION INFORMATION FOR DISABLED

When a rider needs assistance due to a disability or other special need, we ask that they be accompanied by a companion who meets all necessary rider requirements. Only the companion necessary to assist during the ride experience and immediate family (a total of 6 guests including the rider needing assistance) may enter using the access entrance. All others in the party must use the main ride entrance. ***Companions are suggested to ride prior to the guest requiring assistance in order to make an informed decision on whether or not to ride.***

SUPERVISING COMPANION INFORMATION

- Each of our ride and attraction experiences are uniquely different. Ride admission requirements are determined by the ride dynamics, the ride restraints and manufacturer recommendations. Ride requirements, such as height, weight and supervising companion procedures apply to certain rides and attractions. Specific requirements for each ride and/or attraction can be found starting on page 9 of this book.
- A supervising companion, who is 16 or older, must ride with the guest they are supervising and be positioned in such a way as to permit them to monitor and communicate with the guest being accompanied.
- On attractions with forward facing row seating, the supervising companion must be to the side or one row behind the guest they are supervising within the same ride vehicle. On attractions where the supervising companion and guest being supervised ride in a vehicle with seating that faces inward (for example), the supervising companion may sit anywhere in the ride vehicle.
- The supervising companion may supervise more than one guest as long as the above criteria are met.

RIDE SHUTDOWNS

Rides may close at times for maintenance or periods of inclement weather. **In the event a ride needs to be evacuated (which could result from a mechanical problem, weather conditions or power interruption), a guest may need to maneuver across catwalks, from the highest point of a ride, and up or down steep grades or steps.** Prior to riding, you and/or an Attractions Team Member should determine if companion assistance would be required in the event of an evacuation.

RE-RIDE POLICY

Due to the dynamic physical forces experienced while riding, **all** guests will be asked to exit the following attractions after each ride:

High Thrill Attractions

The GIANT Barn Swing, PowderKeg, Thunderation, WildFire, FireFall and Outlaw Run

Moderate Thrill Attractions

Electro Spin, The Grand Exposition Coaster, Racing Regatta, Royal Tea Party, Magnificent Wave Carousel and Fire-In-The-Hole

Mild Thrill Attractions

Fire Spotter

Guests who decide to ride again will be asked to use the main entrance queue.

Guests utilizing the accessibility entrance will be asked to return after a period of time equivalent to the current wait time in the main queue line.

BOARDING POLICY FOR GUESTS WITH DISABILITIES

The following procedure will assist guests with disabilities and their parties wishing to utilize the Disabled Access Boarding Program. Accessible entrances are available at each ride. Ride operators will inform you how to board each ride. **Guests must leave their wheelchairs to board certain rides. Our ride personnel do not have the specialized training required to physically load or unload guests who need assistance.** Please plan to visit the park with someone who can physically assist you when necessary.

1. For the following rides: American Plunge, The GIANT Barn Swing, Lost River Of The Ozarks, PowderKeg, Thunderation, WildFire, FireFall and Outlaw Run, when possible the disabled rider should utilize the access entrance and meet a ride attendant to request a boarding time and for screening. If the disabled rider was not present when the boarding time was issued, he/she must be screened prior to riding.
2. To be fair to all guests waiting to ride, the ride attendant will assign a boarding time based on the current estimated wait time in the main queue and record that time on the ride admission policy form found in the back of this guide. If requesting a special seat (e.g. front or back seat on a coaster), please inform the ride attendant when handing them this guide. Due to the popularity of some seats, the wait time may be extended.
3. You are not required to wait at the access entrance, but should return with your party (a maximum of 6 guests including the disabled guest) at the assigned boarding time using the access entrance.

If there is no wait time in the main queue, your party will be asked to remain at the access entrance and will be allowed to board after a brief wait.

The guest with the disability must ride in order for the party to use this program. ALL guests must meet the ride requirements in order to ride the attraction.

If you require additional assistance, please contact any ride attendant. It is our pleasure to attempt to provide additional assistance if possible.

OFFICIAL MEASURING STATION

Guests may visit the measuring station, located in the Grand Exposition, to be officially measured and receive a height wristband. Parents will also receive helpful information on attractions their child can ride with and without a companion.

Guests will be measured as they present themselves at the measuring station, from the ground to the top of the head. Guests unable to stand will be measured using a flexible measuring tape. All guests must remove or change out of backless shoes prior to being measured.

Description of Ride Symbols

ACCESS SYMBOLS

Identifies access entrances throughout the park. Also used in Ride Descriptions section to indicate that guests can remain in their wheelchair throughout the ride or attraction.

Indicates that guests who use wheelchairs must transfer from their device to the ride vehicle to ride.

Indicates that guests must be able to negotiate stairs and/or step into and out of the ride vehicle to participate.

Indicates that guests must transfer from their ECV to a wheelchair in order to participate in the attraction.

Indicates that guests must meet minimum height requirements to ride.

Indicates that guests must be able to enter/exit the ride safely and have complete upper body control in order to participate.

Must ride or participate with a supervising companion. A supervising companion is defined as a responsible person 16 years or older who meets all other ride requirements.

Indicates that guests cannot be taller than the maximum height posted in order to participate.

PARTICIPATION SYMBOLS

BACK OR NECK INJURY

Not recommended for guests with back or neck trouble.

RECENT INJURY OR ILLNESS

Not recommended for guests who have had recent injury or illness.

PREGNANCY

Not recommended for pregnant women.

SUFFER FROM DIZZINESS

Not recommended for guests who suffer from dizziness.

HEART TROUBLE

Not recommended for guests with heart trouble or high blood pressure.

RIDE RATING SYMBOLS

Mild Thrill Attraction: Low speeds with expected movements and anticipated thrills.

Moderate Thrill Attraction: Moderate speeds with unexpected movements and unusual and stressful physical forces. This ride may contain unanticipated thrills.

High Thrill Attraction: High speeds with extremely unusual and stressful physical forces. This ride contains unexpected thrills appropriate only for healthy and physically able riders.

Fireman's Landing

Fire Spotter ●

Guests under 42 inches may ride with a supervising companion. Guests with a body length of at least 42 inches may ride unaccompanied. Not recommended for guests who may suffer from a fear of heights, vertigo, motion sickness or a history of seizures. Riders will swing up and out to heights of 20 feet in balloon baskets that ascend, rotate and tilt on a central axis. The restraint mechanism is a shared seat belt securing at the waist. Riders must be able to sit upright with control of upper torso, head and neck. Riders must be able to brace with one functioning arm with sufficient lower extremity length to be restrained by the belt. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Fire Wagon Frenzy ●

Guests under 36 inches may ride with a supervising companion. Guests with a body length of at least 36 inches may ride unaccompanied. Not recommended for guests who may suffer from a fear of heights, vertigo, motion sickness or a history of seizures. Riders will experience mild G-forces as the ride rotates vertically in both clockwise and counter-clockwise directions. The restraint mechanism is a shared lap bar securing at the waist. Riders must be able to sit upright with control of upper torso, head and neck. Riders must be able to brace and grasp the restraint with one natural, functioning arm and hand with sufficient lower extremity length to be restrained by the lap bar. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

FireFall ◆

Guests must have a body length of at least 48 inches to ride. Not recommended for guests who may suffer from a fear of heights, vertigo, motion sickness or a history of seizures. Riders will experience a high-speed launch, heights up to 85 feet, speeds of 50 mph and back-to-back positive and negative G-forces. The restraint mechanism is a shoulder harness. Riders must be able to sit upright with control of upper torso, head and neck. Riders must have one natural, functioning arm with the ability to grasp the restraint and one natural, functioning leg with sufficient length to be properly secured by the restraint. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Fireman's Flyer ●

Guests must have a body length of at least 36 inches, but no more than 52 inches to ride. Riders will experience mild centrifugal forces on a ride with single-person seats that swing outwardly as the entire ride rotates. The restraint mechanism is a restraining bar. Riders must have sufficient lower extremity length to straddle the chain. Riders must be able to sit upright with control of their upper torso, head and neck. Riders must be able to brace with one functioning arm. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Lucky's Dizzy Dogs ●

Guests under 36 inches may ride with a supervising companion. Guests with a body length of at least 36 inches may ride unaccompanied. Riders will experience a revolving ride in vehicles mounted on arms which quickly ascend and descend as the entire ride rotates on a central axis. The restraint mechanism is a seatbelt. Riders must have sufficient lower body length to be restrained by the lap belt. Riders must be able to sit upright with appropriate weight distribution with control of upper torso, head and neck. Riders must be able to brace with one functioning arm to hold onto the handgrips, and one leg. Riders may have two amputated legs as long as amputations are below the knee. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Station No. 3 – FireHouse Play Place and FireHouse Splash Yard ●

Guests under the age of 5 may participate with a companion. Not recommended for guests who may suffer from a fear of heights. Guests will experience numerous steps, heights, bouncing, varied walking surfaces and loud noises. Guests may get wet in FireHouse Splash Yard area. Certain areas of this attraction are not accessible to guests utilizing a stroller, wheelchair or ECV.

Up The Ladder ●

Guests under 36 inches may ride with a supervising companion. Guests with a body length of at least 36 inches may ride unaccompanied. Not recommended for guests who may suffer from a fear of heights, vertigo, motion sickness or a history of seizures. Riders will experience heights up to 25 feet as the ride ascends the tower and then bounces up and down while descending. The restraint mechanism is a shoulder harness. Riders must be able to sit upright with control of upper torso, head and neck. Riders with a single amputation above the knee must have one natural, functioning leg to be properly secured by the restraint and the ability to grasp the restraint with two functioning hands. Riders with a single or double amputation below the knee must be able to grasp the restraint with two functioning hands. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

THE GRAND EXPOSITION

Electro Spin ■

Guests must have a body length of at least 48 inches to ride. Not recommended for guests under the age of 7 or guests who may suffer from a fear of heights, vertigo, motion sickness or a history of seizures. Riders will experience heights up to 50 feet as they sit facing outward with their chests against a padded panel on a disk vehicle. The ride rotates and travels at high speeds along a u-shaped track. The restraint mechanism is a padded bar that rests against the lower back. Riders must be able to sit upright with appropriate weight distribution with control of upper torso, head and neck. Riders must be able to brace with one functioning arm. Riders must have sufficient lower body length to be properly restrained by the back restraint. Guests must have the ability to straddle the seat and sufficient lower limb length to utilize the pads on either side of the seat. Riders with double leg amputations must be able to hold on with two functioning arms. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Elephant March ●

Guests must have a body length of at least 36 inches to ride with a supervising companion. Guests with a body length of at least 48 inches may ride unaccompanied. Not recommended for guests under the age of 3 or guests who may suffer from a fear of heights, vertigo or motion sickness. Riders will experience a revolving ride in which individual ride vehicles ascend and descend under riders control on arms attached to a rotating central axis. The restraint mechanism is a seatbelt that secures at the waist. Riders must be able to sit upright with control of upper torso, head and neck. Riders must be able to brace with a minimum of two functioning extremities. Riders must have sufficient lower body length to be restrained by the belt. Amputation may be above the knee. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter by way of the main entrance.

The Grand Exposition Coaster ■

Guests must have a body length of at least 36 inches to ride with a supervising companion. Guests with a body length of at least 42 inches may ride unaccompanied. Not recommended for guests under the age of 3 or guests who may suffer from motion sickness or have a history of seizures. Riders will experience heights of up to 20 feet, sharp turns and moderate drops at speeds up to 20 mph. The restraint mechanism is a shared lap bar. All riders must have sufficient lower body length to be restrained by the lap restraint. Riders must be able to sit upright with control of upper torso, head and neck. Riders must be able to brace with one functioning arm to hold onto the handgrips, and one leg. Riders may have two amputated legs as long as amputations are below the knee. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter by way of the main entrance.

Happy Frogs ●

Guests under 36 inches may ride with a supervising companion. Guests with a body length of at least 36 inches may ride unaccompanied. Riders will experience a revolving ride in vehicles mounted on arms which quickly ascend and descend as the entire ride rotates on a central axis. The restraint mechanism is a seatbelt. Riders must have sufficient lower body length to be restrained by the lap belt. Riders must be able to sit upright with appropriate weight distribution with control of upper torso, head and neck. Riders must be able to brace with one functioning arm to hold onto the handgrips, and one leg. Riders may have two amputated legs as long as amputations are below the knee. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

The Ladybugs ●

Guests must have a body length of at least 36 inches, but no more than 55 inches to ride. Riders will experience a revolving ride in vehicles mounted on arms as the entire ride rotates on a central axis. The restraint mechanism is a seatbelt. Riders must have sufficient lower body length to be restrained by the lap belt. Riders must be able to sit upright with appropriate weight distribution with control of upper torso, head and neck. Riders must be able to brace with one functioning arm onto the handgrips, and one leg. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Magnificent Wave Carousel ■

Guests must have a body length of at least 36 inches to ride with a supervising companion. Guests with a body length of at least 48 inches may ride unaccompanied. Not recommended for guests under the age of 7 or guests who may suffer from a fear of heights, vertigo, motion sickness or a history of seizures. Riders will swing up and out to heights of 40 feet on this stationary swing ride that ascends, rotates and tilts on a central axis. The restraint mechanism is a restraining bar. Riders must have sufficient lower body length to be restrained and straddle the chain. Loading requires stepping up into and down out of the seat. Riders must be able to sit upright with appropriate weight distribution with control of their upper torso, head and neck. Riders must be able to brace with one functioning arm. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the exit gate.

Racing Regatta

Guests must have a body length of at least 36 inches to ride with a supervising companion. Guests with a body length of at least 48 inches may ride unaccompanied. Not recommended for guests under the age of 3 or guests who may suffer from motion sickness or a history of seizures. Riders will experience a revolving ride in which individual ride vehicles ascend and descend along a track while the entire ride rotates on a central axis. The restraint mechanism is a shared lap bar. Riders must have sufficient lower extremity length to be restrained by the lap restraint. Riders must be able to sit upright with appropriate weight distribution and control of their upper torso, head and neck. Riders must be able to brace with at least two functioning extremities (one arm and one leg). Riders with two leg amputations may ride if amputations are below the knee. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Royal Tea Party

Guests must have a body length of at least 36 inches to ride with a supervising companion. Guests with a body length of at least 42 inches may ride unaccompanied. Not recommended for guests under the age of 3 or guests who may suffer from motion sickness or a history of seizures. Riders will experience a revolving ride in vehicles which spin freely on their axis under the control of the rider in vehicle groupings which spin counterclockwise, while the entire ride spins in a clockwise direction on a central axis. Riders must be able to sit upright with appropriate weight distribution and control of their upper torso, head and neck. Riders must be able to brace with at least two functioning extremities (one arm and one leg OR two functioning hands as long as the rider has a normal center of gravity and sufficient lower extremity strength to maintain proper riding posture). Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Mighty Galleon

Guests must have a body length of at least 36 inches to ride with a supervising companion. Guests with a body length of at least 48 inches may ride unaccompanied. Not recommended for guests under the age of 3 or guests who may suffer from a fear of heights, vertigo, motion sickness or a history of seizures. Riders will experience heights of up to 40 feet as the ride vehicle swings forward and backward in a pendulum motion. The restraint mechanism is a shared lap bar. Riders must be able to sit upright with appropriate weight distribution and control of their upper torso, head and neck. Riders must be able to brace with at least two functioning extremities (one arm and one leg OR two functioning hands as long as the rider has a normal center of gravity and sufficient lower extremity strength to maintain proper riding posture). Riders must have the ability to hold on with one functioning hand. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

Wings of Wonder ●

ABLE TO
ENTER/EXIT

Guests under 36 inches may ride with a supervising companion. Guests with a body length of at least 36 inches may ride unaccompanied. This ride is not recommended for guests who may suffer from a fear of heights, vertigo or motion sickness. Riders will experience a revolving ride in vehicles mounted on arms which ascend and descend under rider control. The restraint mechanism is a seatbelt. Riders must have sufficient lower extremity length to be restrained by the belt. Riders must be able to sit upright with control of their upper torso, head and neck. Riders must be able to brace with at least two functioning extremities and be able to hold onto the handgrips. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the main entrance.

HALF DOLLAR HOLLER

Hugo & Mary's Carousel ●

Guests under 42 inches may ride with a supervising companion. Guests with a body length of at least 42 inches may ride unaccompanied. Riders will experience mild centrifugal forces on a revolving ride in which seats also move slowly up and down. Stationary seating is available. Riders riding a carved animal must be able to sit upright with control of their torso, head and neck, brace with one functioning arm and straddle the animal. Riders riding the stationary carriages must be able to sit upright with control of their upper torso, head and neck. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders may ride without meeting physical requirements if accompanied by a supervising companion. The companion rider must meet the requirements. Riders in wheelchairs or ECVs must transfer to an SDC provided wheelchair to ride in the accessible carriage. Riders with disabilities may enter the ride by way of the exit.

Treetop Trail ●

Guests under 36 inches may participate with a supervising companion. Guests must have a body length of at least 36 inches, but no more than 56 inches to participate. If body length is greater than 56 inches the guest must be accompanied by someone under. Not recommended for guests who may suffer from a fear of heights, vertigo or difficulty with depth perception. Guests experience heights, steps, soft and uneven surfaces, netting and climb structures within four treehouse structures featuring interactive elements. Guests and companions may bypass the net maze and net climb using the catwalk and stairs. Guests must be able to maneuver themselves with limited assistance to participate on the Net Maze and Net Climb. Guests must be able to enter/exit the attraction. Guests must exhibit appropriate observed conduct.

This attraction is not accessible to guests utilizing a wheelchair or ECV. Service animals must be able to traverse the catwalk and stairs.

THE GREAT BARN At Wilson's Farm

The GIANT Barn Swing ◆

Guests must have a body length of at least 48 inches to ride. Not recommended for guests under the age of 7 OR guests who may suffer from a fear of heights, vertigo, motion sickness or a history of seizures. Riders will experience a high-speed launch, heights of 75 feet, speeds of 45 mph and back-to-back positive and negative G-forces. The restraint mechanism is a lap bar securing at the waist. All riders must have sufficient lower body length to be restrained by the lap restraint. Riders must be able to sit upright with appropriate weight distribution. Riders must be able to control their upper torso, neck and keep their head against the seat back. Riders must be able to brace with one functioning arm to hold onto the handgrips, and two functioning legs. Riders with two leg amputations may ride if amputations are below the knee. Riders with leg amputations above the knee are prohibited from riding. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. Riders with disabilities may enter the ride by way of the exit.

High-Low Silos ●

Guests must have a body length of at least 40 inches to ride with a supervising companion. Guests with a body length of at least 48 inches may ride unaccompanied. Guests who exceed 80 inches in body length are not permitted to ride. The maximum load per seat is 198 pounds and 396 pounds per chair group. Each chair group may only seat one adult and one child per ride. Not recommended for guests under the age of 5 or guests who may suffer from a fear of heights, vertigo or motion sickness. Riders will experience heights of up to 25 feet and controlled vertical drops on a tower that rotates slowly. The restraint mechanism is a lap bar and seat belt securing at the waist. All riders must have sufficient lower body length to be restrained by the lap restraint/belt. Riders must be able to sit upright with control of their upper torso, head and neck. Riders must be able to brace with two functioning legs. Amputations below the knee are allowed. Riders must be able to enter/exit the ride. Riders must exhibit appropriate observed conduct. To ascend or descend the tower, riders must be able to grip and pull a vertical rope attached to the ride vehicle. Riders with disabilities may enter the ride by way of the exit located in front of the ride.

Silver Dollar City®
